DOCKET FILE COPY ORIGINAL

The Internet was developed with the Taxpayer's money. It was subsidized with the Taxpayer's money. This is how we are treated by the 1%. We the People develop, they the 1% gansterize and shiest. They use the money of others to borrow vast sums, and then use that to consolidate and monopolize. The intent is to push out the small business, destroy competition, and set prizes the way a parasite would like. The large internet service providers wish to burn the common person's candle at both ends.

Wrecking the internet and Neutrality is the latest public service (utility) they see as a new revenue stream. Stop this insanity; stop the Cable-ization of the internet. Keep net neutrality.

ISPs should not direct or deny websites. ISPs should not have fast and slow lanes to send data. They already charge differently on the receiving of data, how much more do they need? Keep net neutrality!!

Respectfully,

Olga Martinez
